

RECOMMENDED SYSTEM REQUIREMENTS:

- Microsoft® Windows® 2000 SP4, XP Home/Professional SP1/SP2
- Microsoft® Word 2000, 2002 (XP) or 2003
- 450 MHz Intel® Pentium® III processor
- 256 MB memory
- 800 x 600 High Color (16 bit) display
- CD or DVD recordable drive or network access (for archiving or long-term storage)
- USB port (for audio capture with either the iMic™ or Marantz® recorder)
- Optional requirements: microphones or audio mixer

FTR Hearings is a two-channel audio recording and management solution designed for individuals and organizations that record meetings or hearings. FTR Hearings can save significant time and money by providing a complete, yet simple, recording and rich media management solution.

Unlike standard recorders, FTR Hearings will record directly onto a PC hard drive or it will ingest audio that was recorded using a third-party portable digital recorder.* Participants' notes are automatically indexed and linked to the recording and allow for search, instant retrieval and navigation of the recording on a PC and across the enterprise. FTR Hearings includes:

- **TheRecord Recorder™^{2x}**
- **TheRecord Annotator™**
- **TheRecord Player™**
- **TheRecord Producer™**
- **WordLink® add-in to Microsoft® Word**
- **iMic™ Audio Adapter**
- **Audio Connector Cable**
- **FTR Headset**
- **5-pack TheRecord Album™-CD recording media**

The versatile recording options of FTR Hearings makes it the perfect solution for a variety of recording requirements. The ability to record directly to the hard drive on a PC or ingest recordings from third party portable recording devices makes it the perfect choice for venues that may need to utilize a portable recording device but want the ability to navigate and manage their recordings across the enterprise.

FTR Hearings uses "tape-recorder style controls" which makes it easy to use and learn. It is the ideal choice for hearing rooms, meeting rooms, or other venues that need excellent quality digital recording management. Two-channel digital audio recording with individual channel isolation and volume control during play back ensures users a complete and accurate record of superior quality. Annotations create time-stamps that link directly to associated recorded audio. Managing records is easy because all files are automatically archived to a hard drive and either network or external media.

Versatile Features That Help You Improve Productivity

Convenience & Versatility

- TheRecord Producer software ingests recordings from third party portable recorders to create TheRecord.
- Total digital audio recording and content management solution that includes recording, play back and annotation software, headset, CD's and CD safe felt tip marker.
- No more rewinding and fast forwarding cassettes.
- Create log notes while listening to live hearings or recorded audio.
- Instant access to specific portions of recorded audio.
- "Confidence Monitoring" feature assures users that the record is being captured.

Ease of Use

- Minimal training required; can begin using immediately.
- Powerful internal search engine instantly locates specific annotations.
- Compliant with accessibility requirements for disabled users (*Section 508 in USA*).
- Looks, works and acts like a tape recorder.
- No more lost records from broken or damaged tapes.

*Recordings can be captured via TheRecord Recorder2x, the Marantz PMD671 (available as an optional purchase from FTR), the Marantz PMD660 or CDR420. NOTE: FTR does not supply documentation on the Marantz PMD660 or the CDR420; however we do have documentation supporting the Marantz PMD671.

NOTE: As with any software there are hardware and software requirements which need to be in place prior to installing and using FTR software. While this list shows the recommended system requirements, it is important to be aware that using additional programs may require a higher specification.

How FTR Hearings Helps You Function More Efficiently

ForTheRecord®

VERSATILE!

FTR Hearings is compatible with various approved portable digital recording devices.

FTR Hearings Advantages:

- Search and retrieve log notes and audio at the touch of a button.
- Take advantage of reliable, secure digital storage.
- Use a digital portable recorder device to capture recordings and ingest onto a PC.
- Record directly onto PC via microphones if desired.
- Quick return on investment (ROI).
- Enjoy complete control of playback volume and speed.
- Use "confidence monitoring" feature to ensure proper recording.
- Operate as easily as a conventional tape recorder.
- Improve productivity without changing hearing procedures.
- Create electronic notes dynamically linked to recorded proceedings.
